**Subject:** Re: questions

The google results today appear worse than last month . What is going on

Sorry for all the typos .Sent from my iPhone

Hi Jeffrey,

1. I want to add much more content to your science Wikipedia section. Aside from the Program for Evolutionary Dynamics are there other institutions or departments that you established or helped to establish? Or any pivotal research that you funded?
2. what are the names of your various foundations? (ie: the J Epstein VI Foundation etc). The variety in these names, when added to content, will help pull them up in the engines.

also, I'm adding 4 pages to your personal websites so that content can be posted there. Content links on your websites will pull them up in the search engines since your websites are on the first page. Integrity Defender is working on getting your blog to the first page as well. Your blog is: [www.thejeffreyspteinfoundation.com](http://www.thejeffreyspteinfoundation.com)  
<<http://www.thejeffreyspteinfoundation.com/>>

You are now on about 20 public profile sites, including My Space, Flickr etc. See attached spreadsheet for a summary of all of them.

I'll be sending Leslie more content shortly.  
thank you, hope you are well.
