Hi Tyler,

I noticed that 5 of the websites are back on the 2nd page. The file names are back to the way they were. I removed the photos page from the .org site. According to Webmaster it was slowing the site down.

- I am working on the Wikipedia foundation article.
- Drafting an article for *Huffington*. I know a few people there.

Jeffrey, if you could send me any newsworthy information about what you are working on that always helps.

Thank you,
